

Ways That You Can Save Money on Your Electricity Bill

1. Turn off the lights when not in use.
Turn off all the lights when you leave your home.

2. When you are not using your cell phone charger, stereo, and other things, unplug them from the wall.
Always leave your refrigerator plugged in!

3. Close your windows and doors when you are using the air conditioning or heater.

4. Do not use the air very cold. Set your air conditioning to about 80 degrees.

5. If it is hot outside, close curtains, blinds, and windows to block the sunlight.

6. Air conditioning is very expensive. A fan is cheap.

7. Do not leave your refrigerator door open.

8. In winter, sunlight can help warm your apartment, and it's free! Leave your blinds and curtains open to let sunlight in when it is cold.
